Dear Sir:

This is regarding your letter(copy attached) and subsequent conversation on the telephone. Attached is a copy of a letter sent to John Judge of the Coalition on Political Assassinations dated February 11,1995. As a result of this letter the notice was published in the April issue of Open Secrets (copy attached).

After reading the book The Lone Star by James Reston Jr. I sent him the attached letter requesting information regarding the stetson. Since I had not received a reply I talked to him on the telephone on September 14th. He stated that he had not received my letter and confirmed that the address was correct. He stated that to his knowledge there were no holes in the stetson but was convinced that if there were holes in it the stetson would have been turned over to the authorities for examination. He does not know if the stetson is still in existence.

I hope that American researchers can get conclusive information on the stetson because it is very important.

Sincerely,

Kenneth D. Curry
